

Dr. Alison Cernich, DCoE Deputy Director

Alison Cernich, Ph.D., is a Board Certified Neuropsychologist, who serves as the Acting Deputy Director, for the Defense Centers of Excellence for Psychological Health and TBI (DCoE) and is the VA Senior Liaison for TBI to DCoE, representing Rehabilitation and Prosthetics Service. She received her doctoral degree in Clinical Psychology from Fairleigh Dickinson University (FDU) in 2002. She completed a pre-doctoral research fellowship in outcomes measurement at the Kessler Medical Rehabilitation Research & Education Corporation, funded by the National Institutes of Disability and Rehabilitation Research (NIDRR) and a post-doctoral fellowship in cognitive neurosciences at the National Rehabilitation Hospital (NRH) in Washington, DC. She was previously the Director of Neuropsychology and Director of the Polytrauma Support Clinical Team at the VA Maryland Health Care System. She is an Assistant Professor of Neurology at the University of Maryland School of Medicine. She is the lead or contributing author on multiple peer-reviewed articles and conference presentations, with a specific emphasis on traumatic brain injury and computerized neuropsychological assessment.
